

XM Radio is the best thing that has happened to the trucking industry!!! It not only provides entertainment, but is a very useful tool, AND a safety factor too!!! Now we can set our radio to one channel and listen to it all over the country. No longer do we have to hunt for a new station every few miles, which takes our eyes off the road.

With the Instant Traffic and Weather we get information IMMEDIATELY instead of trying to find a station that has the info only every 10-15 minutes.

XM Radio is a very important SAFETY TOOL!!!!!!!!!!!!

PLEASE do NOT pass NAB's petition 04-160.
